*depending on the order and delivery location.

When you have special specifications, your needs can be met with the best custom designed solution, using CMTP's expertise and innovation. CMTP prompt action processes combined with our quality cases and wooden machinery crates will ensure speedy delivery whilst maintaining the highest quality standards.

The CMTP in-house design team can create variations from the standard (for instance contours to fit various types of aircraft) using state of the art CAD systems. Our team has years of experience in designing packaging for everything from standard wooden crates to custom made cases through to specially designed export crates for small and large scale machinery moves.
